* **Note:** Refer to the Welcome and Introduction lesson in the Sage MAS 90 and 200 e-Business Manager, course curriculum for information on downloading the case study.

Setup Instructions

Copy the contents of the wwwroot case study file into the Inetpub directory on the IIS Server.

Warning: Only do this in a testing or training environment; not in a production or live environment as the default Web page files are overwritten.

Special Security Settings

Some activities may require you to select a specific user of RMD or Supervisor. These users were created in Sage MAS 90 as part of the classroom training and have full access to all tasks, security events, and module options.

- If you are able to create user logons and modify roles in Sage MAS 90, create RMD and Supervisor as users. Assign them to a role with full access to all tasks, security events, and module options. Provide access to all companies created as part of the case study.
- If you cannot create these users, substitute your logon name when prompted to select either RMD or Supervisor.
- If security is not enabled, you may not be able to complete all steps in an activity.
