

Continuing Professional Education Credits

Online Course Requirements

Sage Construction and Real Estate Learning Services

Effective April 1, 2008, individuals who register in any Sage Timberline Office Realtime Learning courses are eligible to receive CPE credits for the National Association of State Boards of Accountancy (NASBA).

Allocation of CPE Credits Per Course

One CPE credit is granted for every 50 minutes of instruction attended. When you register, click Full Details to view the number of CPE credits assigned for each course.

Requirements

In order to meet NASBA requirements for CPE credits, you must:

- Be logged on to the online session.
- Be present during the entire duration of the online class.
- Actively engage in class activities.
- Complete online assessments given by the instructor.

Upon successfully completing a class, you will receive a letter documenting your participation and other information required by NASBA. You are responsible for submitting this information to the state board of accountancy.

NOTE: CPE credits are not automatically awarded. State boards of accountancy have final authority on the acceptance of individual courses for CPE credit.

Site Registrations

For site registrations, only the primary registrant is eligible to receive CPE credits. Participants in the same site who wish to receive CPE credits must register individually and be logged in to the online course.
